

BUCK CUSTOM HOMES

Builder of Fine Shore Homes

Where the standards have been raised.
And the style relaxed.

Inspired by turn of the century vacation homes, this exquisitely detailed shore house is crafted with the finest materials. In fact every Buck Custom Home is created with the artistry of a bygone era. Master homebuilder, Michael Buck, designs all of his seaside escapes with a vision that merges enduring elegance with modern conveniences. And 515 East Atlantic is no exception.

The estate possesses the open and airy flow of windswept sand dunes [which by the way are just a short stroll away.] Yet, the home also possesses a timeless sophistication. In fact, it is this very paradox of “upscale and easygoing” that makes this salty-air sanctuary so distinct.

Upscale elegance meets down-to-earth comfort.

515EastAtlanticBlvd.com

This is the place where generations of your family will create and share memories that will last forever. This is the place where you can feel just as comfortable hosting a refined dinner party as you can donning your flip flops and firing up the BBQ. This is the perfect paradox of shore living.
